

Technical Support Tips & Tricks 2006

Working with Data

- [Controlling Table Structure of Imported Excel files](#)
- [Adding leading zeros to a character field](#)
- [Opening comma delimited files in MapInfo Professional \(!New in v8.0!\)](#)
- [Option to save to allow data editing when opening files \(!New in v8.0!\)](#)
- [Difference between opening an Excel file in MapInfo and making a copy in MapInfo format](#)
- [Modify the attributes of a browser window](#)
- [Update records with certain criteria within table without affecting other records](#)

SQL Selecting

- [Select using a wildcard](#)
- [Selecting all objects of a certain object type](#)
- [Finding records that do not have objects](#)
- [Selecting multiple records with wildcards that have different strings](#)
- [Finding records using like, not and the percent sign as a wildcard](#)
- [Selecting points within overlapping buffers](#)
- [Difference between Contains, Within, and Intersects](#)
- [Order of tables when joining via the Query>SQL Dialog](#)
- [Creating a donut and getting the points within](#)

Mapping

- [Adding a custom symbol](#)
- [Using Set Clip Region with multiple regions](#)
- [Converting a table of coordinates to a table of lines](#)
- [Changing the title of a map window](#)
- [Finding the missing Info Tool](#)
- [Turning Zoom layering on and off](#)
- [Layer Control shows more information using ToolTips \(!New in v8.0!\)](#)
- [Inserting styles into tables \(!New in v8.0!\)](#)
- [Changes do not take effect for line/region/symbol style](#)
- [Creating an inset map](#)
- [Moving objects using the arrow keys \(NUDGE\)](#)
- [Geocode option is grayed out](#)
- [Produce an outer border on a table of points](#)

Labels

- [Using and formatting expressions for labeling](#)

Finding

- [Setting the Default Find Symbol Style to set a default find symbol preference](#)
- [Find Selection in One Window or All Windows Options](#)

Buffering

- [Creating buffers based on an existing table structure](#)
- [Count of points within region](#)

Thematic mapping

- [Creating a bivariate thematic Map](#)
- [Shading a region table based on the Count of Points within each region](#)
- [Custom sort order for Individual Value thematic legends \(!New in v8.0!\)](#)
- [Set the default behavior of “replace layer style” checkbox \(!New in v8.0!\)](#)

Layout window

- [How to get a scale bar into a legend window](#)
- [Setting up a layout window at a particular size and scale](#)
- [Creating layout templates for use in multiple workspaces](#)
- [How to create a Layout template with a current date stamp](#)

Legend

- [Creating a legend that contains only a subset of object types from tables in a map](#)
- [Changing the number of columns or rows in a cartographic legend frame \(!New in v8.0!\)](#)
- [Changing the number of columns in a thematic legend frame \(!New in v8.0!\)](#)
- [Thematic legend is cut off in layout window](#)

Tools

- [CoordinateExtractor.mbx - extract coordinates from a table](#)
- [Distance Calculator - selecting the closest or farthest point](#)
- [Spider Graph – color-coded lines draw between objects](#)
- [Spider Graph vs. Distance calculator](#)
- [Dispersing Points](#)
- [Delete duplicate column values in a table \(!New in v8.0!\)](#)
- [Synchronize Windows](#)
- [Search and Replace](#)
- [Zoom to selection](#)
- [Workspace resolver](#)
- [Workspace packager](#)

Output

- [Copy map window vs. copy](#)
- [Save window as – additional formats](#)
- [Printing translucent rasters](#)
- [Standard procedures in case of printing problems](#)
- [General Printing Tips and Tricks](#)
- [Warning Displays When Print Output is Too Large](#)

8.5 New print engine Additional Resources

- [Hot Sheet for ShortCut Keys](#)
